Activity

TRAITIC is a company dedicated to providing made-to-measure technological solutions for the rail sector of the information and communication systems industries.

At TRAITIC we offer a complete range of product:

- Recognising the client's needs.
- Service viability study.
- Project design and planning.
- Equipment manufacture.
- Equipment integration.
- Guarantee phase.
- Renovation of equipment and services offered to the client.

With these aims of effectiveness, efficiency, security and comfort, at TRAITIC we develop our own Intelligent Transport Systems, based on ICT (Information Communication Technology), whose objective is to support sustainable mobility. In other words, supporting increased mobility based on improving the effectiveness and efficiency of transport and providing security and comfort to the users.

Products

- COSMOS: Modular Train Control and Supervision System.
- SIBI: Active Tilting System.
- ATMS: Bogie Variable Monitoring System.
- ORION: Event recorder.
- HERMES - PIS/PAS: Public Information / Address and intercom Services. HERMES ENTERTAINMENT: Entertainments Services. HERMES - VIDEO SURVEILLANCE: Video Surveillance Services.
- LYNK: Onboard Ethernet Networks with Wireless Interfaces.
